STATEMENT:

I initially came to Alaska while working on the development and production of energy resources. Since 1992, I have served as a medical practice administrator and for the past 12 years have also been an owner of a consulting business for medical practices.

I met my wife in Alaska, and we have 2 great children. I want our children, your family and your children to have a future in Alaska. We must ensure that our children are well educated and trained, have respect for our resources, and develop those resources responsibly in the future.

I am interested in responsible Arctic development as global warming advances, and I will make sure that Alaska is ready to lead the way. Alaska will have the opportunity to be the leader in Arctic exploration, navigation and shipping. Naturally, Alaska's universities will have the opportunity to take the lead in scientific research in the Arctic marine environment.

I have made tough decisions in the boardrooms, trimmed budgets and held people accountable for their actions. I will use my experience as a businessman and an Alaskan to improve life in Alaska.

I am willing to prepare Alaska for new businesses, more jobs, and do it in a way that preserves the best of Alaska. I know that one size doesn't fit all and rarely fits Alaska. As your representative, I will listen to your concerns and do my best to understand your needs.

I appreciate your vote and pledge to represent all Alaskans.
