Statement:

I was born and raised in this district. My ancestral ties go back many generations. My roots are deep and so is my commitment to better the lives of our citizens and our communities. Our backyard is changing opening new ventures, with the thawing of the tundra and the melting of the Arctic ice. It is my intent and my responsibility as your State Senator, to ensure our region participates as our state moves forward.

Education: Education is the backbone of all society. The better educated our children are, the brighter the future for us all. Rural educators face many challenges that can be overcome. I fully support education and will continue to be a strong advocate.

Energy: Every Alaskan deserves affordable energy. As a resource rich state (oil, gas, wind, and tidal), our state should and could, harness all of this energy to benefit all of its citizens. I pledge to continue to work towards reducing the high cost of energy in rural Alaska.

Fish and Wildlife Management: Our region continues to experience fish and wildlife population declines. I fully support funding continued research and increased funding for the Fish and Game budget to address this issue.

Water and Sewer: Clean running water and sanitary sewage make a healthy community. Our state has made great strides in this area but now face the most challenging and expensive communities to serve. In addition to aging infrastructure, funding has diminished. I will continue to fight for funds.
