

Paul Seaton-Republican-House District 31

Statement:

Paul Seaton has been actively involved in Kenai Peninsula communities for 37 years. As your Representative he works hard for an Alaska that values fiscal responsibility, quality education, improved health care, responsible resource development, and accountable government.

Paul responded to the needs of Alaska's students for quality education by finding answers to funding problems that enjoyed bipartisan support. Paul is a leader in bringing technology and vocational education back to the classroom and worked hard for the results-based Alaska Performance Scholarships and Project Grad that reward hard work by making Alaskan colleges and technical schools more affordable.

Paul continues to work to improve the safety and accessibility of healthcare in Alaska. In 2011 he was able to pass the resolution moving the state to a "Prevention of Disease" model of healthcare.

Paul works hard to ensure resource development is responsive to our communities. He sponsored the legislation that: repealed an oppressive tax on sand and gravel operators; expanded Geoduck clam farming; and the proposal to bring the Bering Sea pollock and crab fleet to homeport in Alaska. He supports sustainable fisheries for all user groups.

Paul is bringing affordable natural gas to many communities in his district, enhancing individual energy security and economic development. Paul promises to continue to provide you with his weekly analysis of the issues during session through his email newsletter, allowing constituent input as legislation is being formed.

Please vote to return Paul to the House to continue listening to and working for Peninsula residents.
