Statement:

As President of the United States, Mr. Castle's priority will be to strictly adhere to the Constitution in any proposed legislation or federal government policies, including the ending of unconstitutional wars and unconstitutional foreign aid. He will work to make sure that America's veterans and military personnel receive the care and support they need for injuries and hardships they have incurred while serving in the armed forces.

He will work to withdraw the United States from the United Nations and restore American Sovereignty. He will also work to end the Federal Reserve System and restore the gold standard to strengthen the dollar, both home and abroad.

He will work to withdraw the federal government from international legislation such as Agenda 21 and begin the process of handing control of their lives and property back to the local people.

Another priority of a Castle presidency will be to work towards the ending of abortion in America by vetoing any funding for abortion providers such as Planned Parenthood, as well as recommending to Congress (and working to make it happen) that they remove all jurisdiction over such matters from the Supreme Court.

Darrell Castle believes that "It is the nature of the State to seek dominance over the population. Freedom will not ultimately remain intact if we leave it unattended. America needs forward thinking leaders. Self-hatred and appeasement only foster more disrespect. We must find a way to chart our own course in the world as free and independent people."

Service Organization(s) Memberships:

Founder and Chairman of the Constitution Commemoration Foundation, an organization which seeks to foster increased understanding and application of the original intent of the Founders of our Constitution. Formerly Executive Director of Trapper Trails Council of Boy Scouts of America. Author of book and lecture series titled: "To Preserve the Nation," a work intended to illuminate the principles of sound government and liberty.

Other:

Lifelong student of the political foundations of The United States, focusing on History and the Writings of the Founding Fathers of the nation.

Statement:

The United States Constitution is a written, binding contract between those elected to hold office, and the citizens of the nation. All who hold office are required to take an oath to abide by the Constitution. The Constitution grants specific power, and withholds all other power from the national government. Those holding the reins of power at the national level have forgotten the sound principles of proper government which are embodied in the plain English words of the United States Constitution, and we have strayed far into paths which undermine our liberty and our God-given unalienable rights.

I seek a return to the foundation principles upon which this nation was established, working to restore a national government which is constrained to act within the framework defined within the Constitution. This will protect our individual God-given unalienable rights, and allow us to preserve the blessings of liberty for ourselves and our posterity.

This nation is mired in the morass of party politics. We continue to vote for the same two parties, with the same disappointing outcomes.

If you are tired of “politics as usual,” and have grown weary of the agendas of the current two party system; seeing an ever increasing encroachment of big government in your life, regardless of the party which holds power, join with me and others who love liberty more than the political process.

Vote for the restoration of the original principles of liberty.

My contract with America is my oath to the United States Constitution.
