Statement:

I am asking for your vote because I think you share my concern that “succeeding generations” will not be able to enjoy “our heritage of political, civil, and religious liberty” promised in the preamble to our state constitution unless the cost of governing is reduced to a level that can be sustained without overburdening the productive elements of our society.

Oil revenue has allowed special interests to demand services that are not sustainable and this led to the budget situation our state government faces today.

Some are calling for imposing broad based taxes and taking the people’s dividend to prop up current state budgets. This will not enable the private sector to sustain the governing function.

With your support, I will work as your representative with all legislators to:

- Make the cost of state provided services more transparent,
- Provide those services more efficiently, and
- Fund the appropriate level of services that the productive element of our society is willing and able to sustain.

I will not cater to any special interest or join any caucus that demands increased spending to access reserves and I will not support taking the dividend that belongs to all Alaskans or implementing broad-based taxes to prop up spending levels that are not sustainable.

I moved to Fairbanks over 10 years ago to become part of ‘The Last Frontier’ – now it is time for us to renew that spirit and let our great land be Alaska.

Thank you for your vote and your support.
