**Statement:**

It is crucial the State of Alaska has a balanced, sustainable budget going into the future. This is necessary in order to provide a stable economy for the people of this state, as well as businesses and future investors. In order to create this stability it is going to be necessary to continue cutting waste in Government, decrease oil tax credits, and pursue new forms of revenue generation. It is time to look at a reformation of the PFD, so that we insure we are able to continue to pay dividends to future generations, while continuing to move our state in a forward direction. Fish and fish related occupations are this state's largest private employer, we need to maintain a healthy, sustainable, renewable resource in fish. Sufficient funding of the Department of Fish and Game is imperative. It is our duty to protect all of our natural resources for the betterment of the people of this state. Adequate funding of K-12 education and Public Safety is necessary.

In order to accomplish this, it is necessary to have the ability and relationships to work across the table with all legislators. I believe my record for the last 2 years has shown I have created those relationships. I have been proud to serve as your Representative and I hope to continue to be your voice in Juneau for the 2017-2019 legislative session.
