### **STATEMENT:**

As an Alaskan, I want to be sure that I am representing all Alaskans; I believe each and every Alaskan deserves to share in the resources and wealth of Alaska. I will work to open Anwar. It's time we start thinking outside the box. We Alaskans are very independent people and are very proud of our way of life. I consider myself to be a moderate Democrat. I will listen to ideas and working with constituents to ensure that we pass laws that make sense for Alaska, because I believe Alaskans must come first. As another way to create more jobs here in Alaska is to expand the development of the state's natural resources. On the North Slope there are thousands of cubic feet of natural gas being burned off daily. If we were to expand the existing power plant, diverting the gas being burned off to this larger power plant that power plant can then generate a vast amount of electricity which can be sent underground to the power grid at a reasonable cost. Turning the North Slope natural gas into cheap source of power for Alaskans. This additional power can help offset the overall cost of electricity in state and this power could be delivered to the grid with in a year. I have already drafted a bill for treatment and protection for those with Post-Traumatic Stress Disorder. Please visit my web site for more info [www.Alaskans4Doug.com](http://www.Alaskans4Doug.com)

Again I am Doug Urquidi, Alaska's key to the future.
