Position Statement

The Children of Alaska are our future! We must properly fund education while holding school districts accountable for the needed improvements required. We need to recruit and retain excellent teachers by creating a defined benefits plan that is financially feasible and properly invested. My wife was a public-school teacher for many years, the Tier III retirement system is not cutting it. We have to take care of our teachers. The same thing can be said about our public safety personnel. As a former Police Officer, law enforcement holds a special place in my heart.

The state should fund the PFD as designed. We have to stop using the PFD to balance the budget. The formula wasn't designed for that and if we continue to use the PFD in this way, we will deplete the fund. Responsible budgeting now means protection of the PFDs for generations to come. We must develop additional revenue sources to support the state budget and this includes resource development.

We must work together for the good of the whole. We must look at what is best for our districts, our students, and our state. The problems of rural Alaska are as important as urban Alaska. I will always fight for fairness for rural communities. Too often cuts affect rural communities the most, and we need an advocate in Juneau who understands out interior communities.

I'm a service minded individual that will work hard to make our great state even better.
