Other (Biographical Information):

Alaskan born and raised. I've been involved in our local community for many years. Seeing the struggles and the triumphs of our community and its members, I decided to run to represent the whole district not just political favorites. It's time we have a representative that will look at our local issues and bring representation back to the district. Time to put common sense thinking and working together to accomplish our goals as a State and our district. I look forward to hearing from you.

Position Statement

Balanced budget- Don't spend what we don't have. Sometimes like in our own house we need to make certain cutbacks. Enforce the laws already on the books not just create new ones. Take care of our older adults (senior community) while working to make our district affordable for young families wanting to make the peninsula their home. Make sure we aren't creating new obstacles that prevent our businesses from being strong and support positive economic development. Healthcare, both physical and mental needs are to be looked at and addressed to make sure we are doing everything we can to ensure our resident's needs are met and access is available. PFD- Go back to what the founders Hammond and Tillion envisioned it to be, for Alaskans, not politicians. Public Safety - making sure our roads, police, and firefighters/EMS have the resources needed to provide the services we all have come to count on. Education - our constitution states we must provide a sound education to all Alaskans. Making sure we have adequate funding and maintaining a quality program. When public dollars are used it needs to stay within the boundaries of the constitution. I do not have all the answers, nor should you expect one person to. One thing I offer is the willingness to work with you the district 6 community and the members of the legislation. Let's put aside political differences and do the job we are so humbly asked of us by you the voters.
