Education:
BYU-HAWAII, BA in Political Science

Service Organization(s) Membership:
AMAC, VRWAK, FCE

Special Interests:
Make Alaska Great Again

Other (Biographical Information):

I'm a pro-life, pro-2nd Amendment, pro-Trump, pro-PFD, pro-natural resources, pro-infrastructure, and pro-family. I was born and raised in Taiwan in a Christian family. My parents escaped from China after Chinese Communist took over mainland China. My grandparents were killed by the communists and their property were confiscated. Communism or Socialism fails miserably because steals our freedom. I came to the United States in my 20s to further my college education completed my bachelor degree in Political Science. I am a Mother of five, Full PFD supporter and ready to join the house as a leader who will stand up and will not give into special interest targeting your rights.

Position Statement

We must develop our vast resources to counter the communist economy with freedom. Our Alaskan free and clean environment is important to our economy and our values. Alaska cost living is high, a full PFD promised and stated in state law. We need to control spending and restore our PFD dividend. Back to basic education and skills training with greater choice. I will seek to reduce the budget eliminate unnecessary expenses. We must complete the Port Mackenzie Railroad extension. Build bridges and roads extending our ability to enjoy and protect our vast resources.

Prosperity means our economy should not be controlled by the socialist trying to make us a state park and stop or progress or delay it beyond repair.

1. Develop and refine our Alaskan oil
2. Build a strong mining environment
3. Produce more timber from all areas of Alaska
4. Bring infrastructure bridges roads direct access to development

We must harness our vast resources while preserving Alaska's beauty. When cities like Anchorage are spending 60 million on a new school and billions on dredging the Don Young Port. We need to debunk the over play of clean energy and the carbon power grab that is turning our farmlands into carbon absorbers. We have oil gas, coal right here in Alaska why would we abandon our natural resources collapsing our future Dividends. We must restore the PFD to its original five year formula modeled by Hammonds five year average.
