Position Statement:
My obligation, as your representative, will be to uphold the principles that all persons have a natural right to life, liberty, the pursuit of happiness, and the enjoyment of the rewards of their own industry; and that all persons are entitled to equal rights, opportunities, and protection under the law - as Article 1, Section 1 of our State Constitution proclaims we are dedicated.

I believe that the legislature will serve Alaskans best by ensuring our resources are managed according to the policies established by Article 8 of Alaska’s Constitution. Specifically:
Renewable resources (fish and game, timber, etc.) should be managed on the sustained yield principle.
Non-renewable resources should be managed to obtain maximum monetary value over the long term.

I believe depositing surplus annual resource revenue into the corpus of the Permanent fund, then distributing earnings from that fund directly to individual Alaskans as dividends is the most equitable and democratic way to realize the benefit from Alaska’s resource wealth. It also leaves individuals free to contribute toward providing the level of services they honestly want to see provided without infringing on their neighbor’s right to make similar decisions.
I will be happy to represent you according to these principles and I thank you for your vote.
